

The atmosphere of the last day of UTBK Phase I

Tuesday, 14 July 2020 16:20 WIB

HumasUPNVJ - The implementation of the last day of the Computer Based Writing Examination (UTBK) at the UPN Veteran Jakarta UTBK center (Campus I Pondok Labu - Campus II Limo) Tuesday 14 July 2020 went smoothly.

There is no significant difference regarding the stages of implementing UTBK both on Campus I and Campus II. All participants went through the stages of washing hands, checking body temperature and checking participant cards before entering the room.

Hugeng Budianto as the public relations coordinator in the 2020 UTBK-SBMPTN implementation said that the series of UTBK phase I activities at the two UPNVJ campuses ran smoothly and experienced no significant problems, all in accordance with the Covid-19 health protocol and directions from the LTMP central committee.

Apart from that, Wardianto as the implementing officer at Campus II also said the same thing regarding the implementation of the exams at Campus II, "Thank God the implementation of the exams from the first day to the last day for the first stage at Campus II went smoothly and everything was according to the protocol. health. The stages that we apply are all the same as those on the Pondok Labu campus. The participants were prepared for a hand washing area, followed by measuring body temperature and then examining the test card. In each exam room we have prepared waiting rooms that have been sterilized beforehand. Obviously Ward

"During these ten days, the obstacle that occurred from the participants was the wrong location, where they should have taken the exam here (UPN Limo Campus 2) instead they went to Pondok Labu Campus 1, but those who were in the wrong location could still take the exam because they came according to the schedule. (not too late), so actually this is just a small obstacle whose solution lies with each participant who should be able to pay more attention to information long before they carry out the exam. he continued

The UPNVJ public relations team also conducted a short interview with Andika, one of the UTBK participants regarding his preparation and response regarding the health protocol that UPNVJ had implemented, "The preparation is definitely studying, sis and the important thing is prayer, especially after this exam we are still anxiously waiting for Announcement of exam results." Said Andika

UTBK phase II will restart from 20 July to 27 July 2020. We urge all prospective UTBK phase II participants to prepare well and always pay attention to the information on the official *website* of the LTMP central committee (<https://ltmpt.ac.id/index.php>) and also the official UPNVJ website (<https://penmaru.upnvj.ac.id/>)
