The Faculty of Medicine UPN "Veteran" Jakarta and PMI South Tangerang city are working together in holding a humanitarian activity, namely "Blood Donation & Free Medicine". This event is part of the 2nd Anniversary of UPN "Veteran" Jakarta.

This activity was attended by around 180-200 potential donors who prioritized the entire academic community, namely lecturers, staff and students from the scope of UPN "Veteran" Jakarta. However, the number of donors who successfully passed the test was around 85 people due to the limited resistance of blood. Next, the blood that already exists will be accommodated by PMI in South Tangerang City and distributed to people who need it in South Tangerang City. Not only blood donors, mass treatment was also held in the form of health checks, general disease consultations, and free medicine for participants.
