FEB Lecturer Team in Community Service

(Dr. Miguna Astuti, S.Sc., MM., MOS., CPM, Rosali Sembiring, SE., MM, and Jenji Gunaedi Argo, SE., MM.

**HumasUPNVJ** - The longer period of the Covid -19 pandemic has made Small and Medium Enterprises (UKM) actors in the Cinere District area choose to buy and sell from home or use online applications. This led UPN Veteran Jakarta Lecturers (UPNVJ) to take the initiative to organize Acrylic Flower Making Training for the development of SME businesses at the Cinere Depok Sub-District Office, last Thursday (10/06/21).

This Community Service and Research Lecturer Team includes Permanent Lecturers from the UPNVJ Faculty of Economics and Business (FEB), including Dr. Miguna Astuti, S.Sc., MM., MOS., CPM, Rosali Sembiring, SE., MM, and Jenji Gunaedi Argo, SE., MM. In this community service program UPNVJ lecturers collaborate with Griya UKM Cinere to conduct training that is useful to fill their time with positive and useful things, if occupied it will become a companion business.

Dr. Miguna, one of the community service lecturers in his report, said that this program was a collaboration that had been mutually agreed upon with the aim of providing other skills to UKM actors and it was hoped that these would become skills that provide selling points to the targeted business actors.

" After discussing with the chairman of Griya UKM Cinere Mrs. Harry Astuti, the team agreed to provide training on making acrylic flowers to UKM players in the Cinere area. The team hopes that the participants can make acrylic flowers. In the training, all participants diligently practiced and the participants' work was brought home as a model for training at their respective homes , said Dr. Miguna in his report to the UPNVJ Public Relations Team on Wednesday (14/07/21).

In accordance with the joint agreement, this activity will be continued and monitored by the chairman of UKM Griya Cinere and other PKK cadres. With this, it is hoped that Cinere Region SMEs can continue to practice until they are proficient and can produce interesting works from acrylic materials.
