

Reviewing the Hyperbaric Medical Service Unit, UPNVJ Receives a Visit from Prof. Abdul Razak Hadi from UNIKL

Friday, 03 June 2022 23:35 WIB

UPNVJ PR - Prof. Razak Hadi from Universiti Kuala Lumpur visited UPN Veterans Jakarta Faculty of Medicine to review the readiness and preparation of the Hyperbaric Medical Service Unit. Prof. Razak was accompanied by Prof. Dr. Guritno as a hyperbaric expert from the University of Indonesia and the Rector of UPNVJ, Prof. Dr. Erna Hernawati. (3/6/22)

Prof. Razak reviewed every room in the Hyperbaric Service Unit such as chamber and control panel equipment, doctors, nurses, operators or technicians, and administrative officers. This is because the UPNVJ Hyperbaric Service Unit has been opened for the public. According to Prof. Guritno, UPNVJ's chamber is different and the best from other chambers; the latest and most sophisticated chamber therapy can provide better and easier health care for patients. In addition, Hyperbaric therapy at UPNVJ has advantages that are not available in other places, for example here patients can relax in the chamber while drinking coffee, soft drinks, or whatever drinks the patient wants.
