

UPNVJ Conducts Health Tests for Freshmen of Faculty of Medicine and Faculty of Health Sciences for the 2022 SBMPTN

Tuesday, 28 June 2022 15:35 WIB

UPNVJ PR - Just like the previous National Selection for State University Entrance (SNMPTN), prospective new students of UPN Veterans Jakarta who pass the Computer-Based Writing Examination - Joint Selection for Higher Education Entrance (UTBK - SBMPTN) must also pass the health test stage. The health tests that UPNVJ carries out include medical tests, color blind tests, and drug tests. This medical test is useful for selecting prospective new students so that they truly meet the requirements and conditions as new students in the medical and health study program. The medical test was carried out directly at the UPNVJ central campus, Pondok Labu. (27/6)

Met by UPNVJ's Public Relations Officer in between his work, Fajar Nugroho as the coordinator for implementing UPNVJ's 2022 new student admissions said that the number of medical and health camaba who attended the health test process amounted to 371 participants (outside camaba who were outside the city). Fajar said that the special health test for the UTBK-SBMPTN route was carried out in accordance with the Covid-19 health protocol and had the same flow as the previous SNMPTN route. The only difference is that the payment process, which used to use cash directly, was changed to payment through a bank (teller/atm/m-banking/internet banking. So with this change, it is easier for test takers to undergo the medical test process," explained Fajar.

Provisions for medical tests carried out at UPNVJ, require prospective new students to bring one sheet of proof of payment for medical tests and one sheet of SBMPTN card, camaba must register first on the available page before carrying out the medical test on the specified day, the cost of the medical test is Rp. 200,000, and camaba are required to apply health protocols while in the campus environment.

Fajar also explained that there were no significant obstacles during the medical test process.
