

Welcomed Well, These Said UPNVJ PMM Participating Students

Friday, 09 September 2022 14:38 WIB

HumasUPNVJ - The 2nd batch of Independent Student Exchange Program which will be held in 2022 (PMM 2) is a domestic student exchange program for one semester from one island to another to provide an experience of diversity through participation in the Nusantara Module, courses, and various activities which can obtain credit recognition of up to 20 credits.

PMM 2 provides an opportunity for Undergraduate (S1) program students to study for one semester at the receiving university in the odd semester of 2022/2023. The location of the receiving university is on a different island from the domicile of the sending university and the domicile of the student's origin. PMM 2 provides lecture options of up to a maximum of 20 credits, which include mandatory activities in the form of the Archipelago Module and courses offered by the receiving university. The total number of inbound students (accepted by UPNVJ) totaled 63 students with a total of 21 male students and a total of 24 female students.

Seeing the enthusiasm of the PMM students, the UPNVJ Public Relations team conducted a direct interview with Muhamad Ilal Sinaga representing the PMM students as the head of the Tribe from Malikussaleh University said that he and his friends were very happy because UPNVJ welcomed the arrival of the PMM participants. "The first impression given by the UPNVJ PMM 2 committee was extraordinary, we were very well received starting from airport pickup, consumption to our housing needs while participating in PMM activities at UPNVJ. All our needs were coordinated very well, we didn't have the slightest difficulty or obstacle from the first time we set foot in Jakarta," Ilal said enthusiastically.

"From the start, I personally chose UPNVJ as the campus of choice for PMM 2, because I know UPNVJ is one of the best campuses in Jakarta. This is one of the right goals because UPNVJ is of course a high-quality campus," he continued

At the end of the interview, Ilal hoped that communication between PMM participants would not stop at this activity but would continue.
