

# CAMABA SNBP UPNVJ 2023 Undergo a Health Test

Saturday, 01 April 2023 00:00 WIB

**Humas UPNVJ** - As in previous years, a medical examination is a routine activity that must be followed by all UPN Veteran Jakarta New Student Candidates (CAMABA) from various pathways. Considering that last Tuesday (28/3) was the announcement of the 2023 SNBP, according to the schedule determined by UPNVJ, today (31/3) the medical test process has taken place for all UPNVJ 2023 SNBP freshmen.

The medical test took place at the UPNVJ Limo Campus, precisely at the Merce Building, floors 1, 2 and 4.

Fajar Nugroho, Coordinator of New Student Admissions (Penmaru) UPNVJ when met by the UPNVJ Public Relations team explained the preparation process and flow before the freshmen took the test, "The preparation process for this Health Test is very extensive and very mature. We mobilized all educational staff and medical personnel for the benefit of this activity. Then apart from the preparations we have prepared, we also appeal to all freshmen that there are a number of things that must be considered, before coming directly to UPNVJ Limo, freshmen must first register on the [activity.upnvj.ac.id](https://activity.upnvj.ac.id) page and later there will be related information health test payment guide at the link <https://s.id/tesnarkobaupnvj> . Candidates must pay the cost of testing for narcotics and dangerous drugs/substances in

the amount of Rp. 250,000.00 and specifically for candidates for the Faculty of Medicine (S1 FK and S1 Pharmacy) an additional color blind test fee of Rp. 20,000.00 via *tellers*, ATMs, or Bank Negara Indonesia *internet banking* (BNI), Bank Syariah Indonesia (BSI) and the State Savings Bank (BTN), and proof of payment must be included when carrying out a medical test. In addition, there is much more information that we have submitted on the official website of Penmaru UPNVJ; [penmaru.upnvj.ac.id](https://penmaru.upnvj.ac.id) and UPNVJ social media; <https://www.instagram.com/p/CqZZnRNpFam/?igshid=YmMyMTA2M2Y=> . This medical test lasts a full day, starting at 08:00 in the morning until 16:00 WIB, "continued Fajar

Met on the same occasion by UPNVJ public relations, dr. Wongso as the coordinator of the medical team explained in detail the things prepared by the committee in charge, "We made several preparations a few months ago, so that on the day of the UPNVJ SNBP freshman health test activities it went smoothly, we provided complete medical equipment, 22 medical teams , 22 other employees who are members of the administration, finance, registration, public relations, security, and cleaning teams. The freshmen take the test according to the medical test flow that has been published on the UPNVJ *website* and social media. Starting from taking serial numbers, registration, blood pressure and urine tests (and color blindness). The obstacle we have today is that there are several freshmen who do not come according to the study program schedule so that some location points (floors) are full, but that lasts for a while because we provide many test location points at UPNVJ Limo." he explained

The number of UPNVJ 2023 SNBP interns who took the medical test today totaled 578 people, because a few of them were outside JABODETABEK. However, those who are outside JABODETABEK are still required to take a medical test at the local RSUD and BNN which has a 6-parameter type of test.
