

# Lifting the Artificial Theme, UFO UPNVJ Holds X Batch Exhibition

Thursday, 31 August 2023 10:55 WIB

**HumasUPNVJ** - As in previous years, this time, UFO "Veteran" Jakarta, which is one of the Student Activity Units at UPNVJ engaged in photography, videography, and graphic design, is again holding a Batch X Exhibition. This batch X exhibition activity took place on August 28 - September 2, 2023 at Plaza Soemari UPNVJ Campus - Pondok Labu and continued with *the premiere short film* and *closing ceremony* on September 16, 2023. Of course, during the X Batch Exhibition this time the main parties were involved in the production process and implementation event is the Candidate for Permanent Member of Class X UFO "Veteran" Jakarta.

This activity was carried out as a form of art appreciation and also the last project of the X UFO "Veteran" Jakarta Batch before being inaugurated as a Permanent Member at UFO "Veteran" Jakarta. This activity was also carried out

as a medium and place for class X UFO "Veteran" Jakarta to express their creativity and also devote all their abilities that had been taught for approximately eight months at UKM UFO "Veteran" Jakarta.

"The target audience for the Generation X Exhibition is open to the public. Until now, many of the internal members of the entire UPNVJ academic community, including active students who have not joined or joined UKM, ORMAWA, KSM, and even the lecturers, have also visited the X UFO Exhibition. Not only internal, but visits also came from the Monday community from around Jakarta, Bogor, Depok, Tangerang and Bekasi," explained the UFO Veterans Jakarta team in a written statement to the Public Relations team.

The Batch X UFO exhibition has the theme *Artificial* which gives a message to make visitors aware that *Ai* is already around them. This message is signaled in each work which is visualized through photography, videography and graphic design. This exhibition also gives a message that adaptation and wise use of *Ai* is the key so you don't get carried away with the development of *Ai* itself. Visitors will be given freedom with a predetermined *flow* to view the works and installations that are being exhibited and continue with *voting* for the works and the "wall of hope" as a medium for conveying their hopes for *Ai* technology in the future. Visitors are also given *freephotobooth* facilities as a souvenir for their visit.
