

Public Health Undergraduate Study Program Receives Superior Accreditation

Tuesday, 07 November 2023 16:08 WIB

Public RelationsUPNVJ - Public Health (Kesmas) Undergraduate Study Program, Faculty of Health Sciences (FIKES) UPN "Veteran" Jakarta (UPNVJ) has succeeded in achieving superior accreditation.

Accreditation is provided by the Indonesian Health Education Independent Accreditation Institute (LAM-PTKes).

These results are stated in the Decree of the Management of the LAM-PTKes Association number 0787/LAM-PTKes/Akr/Sar/X/2023.

After a fairly long process, the Public Health accreditation team was able to pass the field assessment which took place last October and achieved a superior title (excellent) which was signed by LAM-PTKes last October 27.

"Based on the results of the field assessment, there are several points that we must complete, starting from strengthening the curriculum, consistent implementation of research and community service, forming research groups and increasing collaboration that supports the tridharma of higher education," explained Arga, Head of the Public Health Undergraduate Study Program. .

"The success of the Undergraduate Public Health Study Program in achieving excellence is the result of hard work, smart work, prayers and hopes from the reaccreditation team, especially the lecturers, staff and students," said Arga.

"We dedicate these superior results primarily to the Undergraduate Public Health Study Program students who we have been preparing for this reaccreditation from the start, they are our biggest motivation," he explained.

On this occasion, Arga also expressed gratitude and gratitude for the support of various parties and universities in preparing for accreditation until finally getting maximum results.

"We also do not forget and thank the various elements who also support and pray for us, including our family, security friends and office boys, alumni, stakeholders, graduate users, various institutions and institutions that collaborate with us, as well as the leaders," he added.
