

# Chancellor Attends 1945 JSN Training: UPNVJ's Commitment to Become the Backbone of Combat Science

Friday, 19 January 2024 16:47 WIB

**Public Relations UPNVJ** - As an effort to form *Training of Trainers* for the Socialization of Spirit, Spirit and Values 1945 (JSN 45) within the campus environment in particular and society in general. UPN "Veteran" Jakarta ( UPNVJ ) closed the JSN 45 training series at the Bhinneka Tunggal Ika Auditorium, on Friday (19/01/24).

"The independence of the Indonesian nation cannot be separated from the history of the Indonesian nation, so it is necessary to form a cadre of JSN 45 heirs from various elements of society to be able to jointly pass on the values of JSN 45 to the younger generation. "Because education does not just provide science and technology lessons, it also needs to provide lessons that can strengthen the spirit, spirit and national values, national and state unity through JSN45 socialization," said Anter Venus, Chancellor of UPNVJ in his speech.

"Our nation must not lose its identity, this is UPNVJ's commitment to be the backbone in spreading the soul, spirit and values of 1945. Because it has become our collective duty to form today's young generation to unite and embody the values of struggle," he added.

The training was carried out for 5 (five) days and was attended by 30UPNVJ lecturers.

One of them, Rabia, SPT, M, Biomed, lecturer in the Physiotherapy study program, admitted that at first she was confused by the assignment letter she was given to take part in this training. Until finally feeling enthusiastic about all the knowledge provided by the supervisor.

I personally, representing the others, was honestly confused at first when given this assignment. "However, after undergoing it and knowing that our task in the future is to become socializers, this is quite a big expectation given by universities and coaches," concluded Rabia.

"These five days made a different impression and the picture was beyond my expectations, especially when the history was explained by the perpetrators of the struggle at that time, I really felt the atmosphere of the struggle firsthand," he explained.

"With the training provided, on behalf of the other participants, I stated that we are Indonesians. This knowledge must be disseminated widely because if we allow it, we will also allow the younger generation to be eroded by the times and lose the identity of their country," he explained.

"Our students can also be useful in transmitting our knowledge in the digital world, with social media content they can help this knowledge be spread more widely. "Because it also needs to be understood because character attacks are very massive at the moment, so we also have to be active in spreading this knowledge," he said.
