

## Excited about wanting to enter UPNVJ, students enthusiastically came to the UPNVJ stand

Thursday, 25 January 2024 18:26 WIB

Continuing their education to college is one of the plans for students at the high school level and equivalent after graduating from school. It's not surprising that they start looking for information about the university that will be their destination.

The Jakarta "Veteran" National Development University (UPNVJ) is increasingly becoming a target for students who want to continue their education to higher education.

This was proven by the enthusiasm of students from various schools in Jakarta who were very enthusiastic about visiting the UPNVJ exhibition stand at the MGBK DKI Jakarta event, Thursday (25/1) at Balai Samudra Jakarta.

On this occasion, they asked about entry routes, how to register, and the quota provided for accepting new students. Like Zahwa Keysha Maulida from Budi Mulia Utama High School who really dreams of studying at PTN UPNVJ.

"UPNVJ is my dream university. I often do research on PTNs in Indonesia, and UPNVJ is a PTN whose interest and quality is getting higher and higher every year. Apart from that, suggestions and input from my parents also strengthened me in choosing PTN UPNVJ. "For me, UPNVJ is the best place to be able to develop myself and learn according to my interests and talents. That's why I found out a lot about this PTN," said Zahwa.

Likewise, Amira and Haya are a pair of friends who come from the same high school, namely from SMAN 49 Jakarta. His current target is to enter the Faculty of Medicine and the UPNVJ Faculty of Health Sciences.

"I have seen the profile of UPNVJ, the UPNVJ medical study program is very good as proven by superior accreditation, then there are many teaching hospitals and of course I want to treat and help many people. "That was what inspired me to enter UPNVJ Medicine," said Amira

In line with Amira, Haya said that many UPNVJ graduates have proven their abilities in various fields. Apart from that, the Faculty of Health Sciences has complete departments, especially nursing study programs, with adequate facilities.

"UPNVJ is our main choice at SNPMB 2024, the reason is that we are UPNVJ PTN which is located close to home and I have received many testimonials that many UPNVJ health science graduates are accepted in the world of work. "This is proof that there is no need to doubt the quality of UPNVJ's education and teaching staff," he explained.
