

UPNVJ Medical Faculty Students Undergo Basic Medicine and Disease Concept Exams

Wednesday, 12 March 2025 14:43 WIB

HumasUPNVJ - Students of the Faculty of Medicine, National Development University "Veteran" Jakarta (FK UPNVJ) took the Foundation of Medicine IV (FM IV) and Complaint and Disease IV (CnD IV) block exams which took place on March 10-14, 2025.

The FM Block Exam was held at several exam rooms, namely the 2nd Floor, Integrated Lab Room of the Library Building, Cipto Building Floors 1 to 4 and the CBT Lab of the Faculty of Medicine, Limo Campus.

The FM IV and CnD IV Block Examinations are part of the advanced curriculum in medical education, which focuses on the basics of medical science and an understanding of patient complaints and diseases commonly encountered in clinical practice.

The goal is to understand the concepts underlying disease processes and their treatment, diagnose and respond effectively to patient complaints, develop patient management plans based on an understanding of physiology, pathology, and pharmacology, and integrate basic knowledge with clinical skills to address a variety of complex medical problems.

This exam is held every four weeks in the Odd Semester to Even Semester of the Academic Year 2024/2025.

The exam subjects that will be tested include Student Oral Case Analysis (SOCA), Multi Discipline Examination (MDE) and Objective Structured Practical Examination (OSPE).
