

UTBK-SNBT 2025 Trial at UPNVJ Runs Smoothly

Friday, 21 March 2025 00:16 WIB

HumasUPNVJ - National Development University "Veteran" Jakarta (UPNVJ) has conducted a national trial of the Computer-Based Written Examination - National Selection Based on Tests (UTBK-SNBT) in 2025.

According to Fajar Nugroho, the Coordinator of the Implementation of UTBK - SNBT UPNVJ 2025, the trial which took place on Thursday, March 20, 2025, went smoothly and successfully.

"There are technicians and committees who act as participants and supervisors to ensure that the trial runs smoothly," explained Fajar.

"In addition, IT technicians also explore the supervisory applications and applications that will be used by UTBK-SNBT exam participants by looking at the features and functions in the application," he continued.

Overall, the committee is satisfied with the results of the 2025 UTBK-SNBT trial. All systems and infrastructure ran well and there were no significant obstacles.

The number of rooms used in the trial was 30, involving the use of 1020 computers in two locations, namely the Pondok Labu Campus and the Limo UPNVJ Campus.

"The trial implementation went smoothly according to the rundown provided by the central committee," said Fajar.

The trial technique includes a simulation of the implementation of UTBK-SNBT using the same system and infrastructure as those that will be used in the implementation of UTBK-SNBT in April.

With these positive trial results, UPNVJ is ready to implement UTBK-SNBT in 2025 and calls on all prospective students to prepare themselves for the best results.
